Work Experience

The University of Cambodia, Phnom Penh Aug 2025 - Nov 2025

Librarian / IT Support

Assisted daily library operations while supporting the use of public and staff computers. Helped troubleshoot basic computer issues, supported users with common technical problems, and maintained smooth access to library computer resources.

Remote Nov 2024 - Apr 2025

Personal Assistant / Digital Content Assistant

Supported a tech professional with research, digital content creation, and client support across multiple projects. Created and prepared blog posts, social media content, and online updates across various platforms, while conducting research, organizing information, coordinating schedules, and assisting with client-related tasks.

First Bridge International School, Tboung Khmum July 2023 - July 2024

English Teacher

Taught middle school students intermediate English at a private school. Helped students improve their speaking, reading, and writing skills. This experience also strengthened my communication abilities, patience, and adaptability.

Education

ISTAD - Foundation Course May 2026 - Oct 2026

Completed a course covering core IT and software development topics including Java programming, database design and data modeling, React.js web development, UI/UX concepts, Git version control, deployment, and project development.

ISTAD - Pre-University Course Jan 2026 - Mar 2026

Completed a C++ programming course covering programming fundamentals, conditional statements, control flow, OOP concepts, problem solving, algorithms, and project practicum.

The University of Cambodia Dec 2024 - Present

Currently pursuing a Bachelor's degree in Information Technology. Focusing on developing technical skills in programming and core IT concepts.

Samdach Techo Hunsen Suong High School Sep 2018 - Sep 2024

Passed the Baccalaureate II (BacII) examination in October 2024.

Projects

PyDFile

Local windows PDF tool that supports PDF merging, splitting, page editing, conversion, compression, protection, unlocking, watermarking, page numbering, and text extraction. Built entirely in Python.

Pitch Flip

Android coin-flip app featuring 3D OpenGL rendering, customizable settings, animated coin physics, and a hidden volume-based probability mechanic.
